---

### **Professional Summary:**

I am a dedicated and creative Front-End Developer with hands-on experience in building engaging and responsive web applications. My approach is human-centric, blending technical expertise in HTML, CSS, JavaScript, React, and Tailwind CSS with a genuine passion for creating seamless user experiences. I thrive on collaboration, problem-solving, and continuously improving my craft through learning and innovation.

---

### **Work Experience:**

#### **HNG Internship**

*Front-End Developer*

Feb 2025

- Designed and developed a responsive Colour guessing game using vanilla HTML, CSS, and JavaScript.
- Implemented dynamic Colour generation and interactive UI for enhanced user experience.

#### **Frootify Internship**

*Front-End Developer*

Nov 2024 – Jan 2025

- Collaborated with backend developers to build the Frootify Idea Validation Questionnaire with React, featuring a progress bar and state management.
- Styled and enhanced the Frootify homepage newsletter, improving user engagement.
- Optimized download button functionality for seamless Google Play Store redirection.

#### **Tech-Zone**

*Front-End Developer*

July 2024 – Nov 2024

- Built responsive web applications using HTML, CSS, JavaScript, React, and Tailwind CSS.
- Improved website performance by 30% through lazy loading and efficient code structuring.
- Created reusable React components, reducing development time by 20%.
- Integrated RESTful APIs for dynamic data handling.

#### **Ogun-Oshun Water Authorities Development (NYSC)**

*NYSC Intern* – Aug 2023 – Aug 2024

- Automated water distribution tracking, improving reporting efficiency by 40%.
-
