

Alwoesin Toluwalase

alwoesintoluwalase@gmail.com | +234 81 0602 8083 | Abeokuta, Nigeria | [Linkedin](#) · [Github](#) · [Portfolio](#)

Frontend Developer with hands-on experience building production web applications, LMS platforms, dashboards, and onboarding systems using modern JavaScript, React.js, TypeScript, and Next.js. Skilled in API integration, asynchronous data handling, and reusable component architecture. Partners seamlessly with backend teams to deliver clean, maintainable, and highly responsive user interfaces.

TECHNICAL SKILLS

Languages & Frameworks: HTML, CSS, TailwindCSS, JavaScript, TypeScript, React.js, Redux, Next.js, FastAPI, Git.
Tools & Platforms: GitHub, VS Code, Figma, Slack, Jira, Microsoft-Teams, Notion, Supabase, Postman and Canva Pro.
Soft Skills: Teamwork, Debugging & Troubleshooting, Leadership, Communication, Mentorship.

EXPERIENCE

Frontend Engineer Remsana - GFA tech

June 2025 – Present

- Delivered 4 production projects (CAVVA, Xpanda, RBB, Funnab Agro) using React, TypeScript, and Tailwind CSS with full REST API integration.
- Reduced CAVVA asset payload by over 90% converting PNGs (1–2MB) to WebP under 80KB via Squoosh..
- Consumed 54 REST API endpoints across 14 service files on Remsana Business Builder, achieving a 72% optimization grade on internal code audit.
- Shipped a real-time chat system on both CAVVA and Xpanda, enabling live learner-to-admin communication inside the LMS.
- Onboarded 20 groups, 200+ students, and 20 sponsors for the Funnab Agro Hackathon via a custom HTML/CSS/JS registration system.

Frontend Engineer (*Freelancing*) Mecoy Projects & Engineering LTD

December 2025 – January 2026

- Crafted a fully responsive landing page in HTML, CSS, and JavaScript with a Supabase-powered Admin Dashboard for live content management (create, update, delete).
- Added a 4-second preloader that masks JS execution and transitions into smooth page animations eliminating any perceived image delay on load.
- Enforced a sub-1MB image upload cap via Supabase storage rules, auto-notifying admins on oversized uploads and keeping page assets lean.
- Wired an automated content pipeline connecting the admin panel directly to the live landing page eliminating manual redeployments for every content change.

Frontend Engineer (Intern)

HNG

January 2025 – February 2025

- Produced an interactive Color Guessing Game in vanilla HTML, CSS, and JavaScript. Graded 80% on code quality and ranked top 60% across the HNG cohort.
- Structured a fully responsive, mobile-first layout with clean game-state logic and real-time DOM feedback from scratch.

Frontend Developer (Intern)

Frootify – Ogun, Nigeria

October 2024 – January 2025

- Programmed responsive React.js components from Figma designs, slashing First Contentful Paint by 35% across devices.
- Integrated SWR APIs and Jotai state management to deploy an interactive blog system, increasing content efficiency by 40%.
- Launched a homepage newsletter feature, driving a 25% increase in user engagement.
- Designed Framer Motion UI animations and modal pop-ups, boosting mobile app downloads by 50%.

Frontend Developer (Intern)

TECH-ZONE ACADEMY – Ogun, Nigeria

July 2024 – October 2024

- Progressed through a structured 3-stage program mastering HTML/CSS/JS with image optimization and GSAP/Framer Motion animations, then REST API consumption, then full-stack collaboration on a live data/airtime purchase platform.
- Authored reusable React components, cutting feature development time by 20% across engineering teams.
- Executed lazy loading and codebase restructuring across client projects, improving page load performance by 30%.

EDUCATION

Federal University of Oye-Ekiti, Ekiti State | B. Sc. Geophysics

July 2018 – August 2022

CERTIFICATION & TRAINING

Front-End Development Certification – Tech-Zone Academy

ADDITIONAL

Languages: English (Fluent), Yoruba (Native)
